Your Comments:

clean the river. No toxins should be left. Leaving 92% of toxins is not cleaning the river and leaves deadly toxins like.y to be dispersed by the coming earthquake.

we need to clean up the river so people can fish, including bottom fish caught by People of Color.

clean up the river so dogs nad children can play on the banks. 92% dirty is not clean and is dangerous to all living creatures i support the portland harbor cag recommendations. Please implement them and save the Willamette from being known as a dirty river.
